Walmart - View in your home

Mobile Application, AR Feature

Walmart Inc.

"View in your home" is an AR feature lives in the Walmart App, which enable customers to virtually preview furniture, home décor and electronic items in their home before they make a purchase. User can check product dimension, try different color and variation of the product, add multiple items and purchase all together. We utilized advanced room scanning and AR technology, render the product in true-to-size ratio, helps user make more informative decision in their online shopping experience. Our recommendation algorithm gives user smarter choice, where user can swap or add more products in consistent style.
