

Among the candidate startups, the award for the best technological innovation was awarded to Skinjay. This company has adapted the

Two other startups were finalists:

- **Tourism Academy** is the first start-up mobilizing techniques used for Massive Open Online Courses that revolutionize training for the tourism industry. In partnership with Atout France, Tourism Academy produced the MOOC Accueil France.
- **Speakhotel** is a multi-services app dedicated to the hotel business. It may be used free of charge and is multilingual. Its main goal is to simplify and optimize the client's experience at a hotel. People who use Speakhotel app are called "Speakers".

The event also divided the candidate suppliers. The **Award for best technological innovation went to Lutron** which offers the hotel room management software myRoom Vue, a dashboard used by the hotel's technical director to control the intelligent management systems myRoom Plus. It is a powerful, easy-to-use web interface that makes it possible to control and adjust lights, HVAC systems and Lutron's rods or motorized blind systems in hotel rooms using a tablet or desktop browsers. It saves energy and reduces operating costs while continuing to satisfy customers.
