

Lutron Makes Vive Wireless Project Design Even Easier – Quick, Accurate, Immediate Estimates with New QuEst-D Software

With just basic project details, contractors provide clients with on-the-spot lighting control system estimates.

Coopersburg, PA (May 21, 2019) - [Lutron Electronics](#), the leader in lighting controls and automated shading solutions, is helping contractors save time and secure more jobs with quick lighting control estimates for today's smart buildings. QuEst-D Quick Estimating and Design software is an intuitive, web-based tool that walks you through basic project information to instantly provide a code-compliant, Lutron wireless lighting control solution, project estimate, and bill of materials.

"Contractors are increasingly dealing with labor shortages and compressed project schedules," said Rick Walsh, Lutron Product Manager. "Lutron Vive wireless solutions simplify installation and setup and now QuEst-D software makes design, bid, and project estimates easier too. With QuEst-D, contractors can help their customers make an informed choice and deliver project estimates with higher confidence."

Start with just basic project information

With QuEst-D, contractors start by answering basic questions about their project – such as square footage, building location, and project type. The software automatically accounts for regional codes and labor costs then generates, in real time, a suggested bill of material, pricing, and project estimate ready to present to the customer.

Along with one recommended solution, QuEst-D provides alternatives and highlights the benefits and cost of each option. For more in-depth reports and estimates, the contractor can add details about situations, schedules, and code needs. More information results in more specific estimates.

QuEst-D can also be used as a complementary tool with Lutron Designer+ software to layout project specifics on a floorplan and create full submittal reports as the project progresses.

Enhanced wireless opportunities

Lutron Vive wireless solutions offer simple and scalable lighting control for new and existing commercial buildings and help reduce labor cost while significantly increasing system flexibility. QuEst-D further minimizes risk and simplifies the project process with easy solution comparisons, accurate labor estimates, instant cost comparisons, and code-compliant solutions.

QuEst-D will be available late summer 2019 in the U.S. and Canada at no cost. This is a new, web-based tool that helps contractors be more competitive and more efficient in today's fast-paced construction cycles.

Visit Lutron at LightFair, Booth 1724 for a preview of the QuEst-D software.

About Lutron Electronics (www.lutron.com)

Founded in 1961, Lutron Electronics is headquartered in Coopersburg, Pennsylvania. From dimmers for the home, to lighting management systems for entire buildings, the company offers more than 15,000 energy-saving products, sold in more than 100 countries. In the US alone, Lutron products save an estimated 10 billion kWh of electricity, or approximately \$1 billion in utility costs per year. The company's early inventions— including the first solid-state electronic dimmer invented by Lutron's founder, Joel Spira—are now at the Smithsonian's National Museum of American History in Washington, DC.

Introducing QuEst-D from Lutron

EASY | ACCURATE | IMMEDIATE LIGHTING CONTROL ESTIMATES

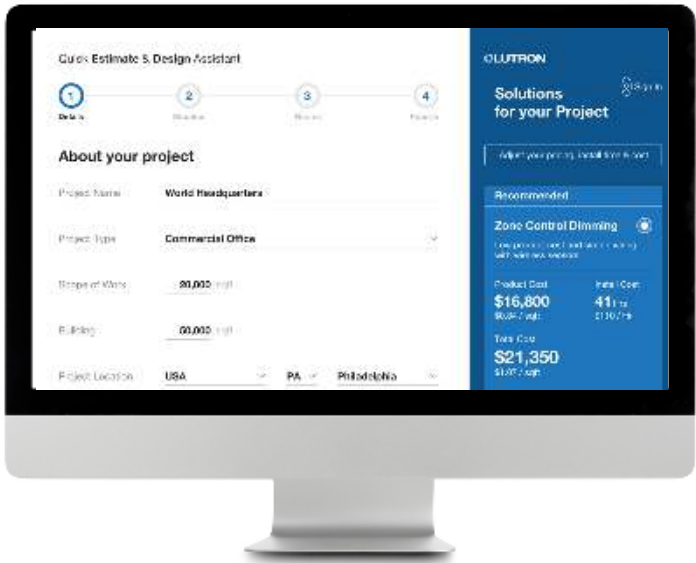

QuEst-D is easy-to-use software that walks you through basic project information, and instantly provides a Lutron wireless lighting control solution, project estimate, and bill of materials.

- Easy solution comparisons
- Accurate labor estimates
- Instant cost comparisons
- Code-compliant solutions

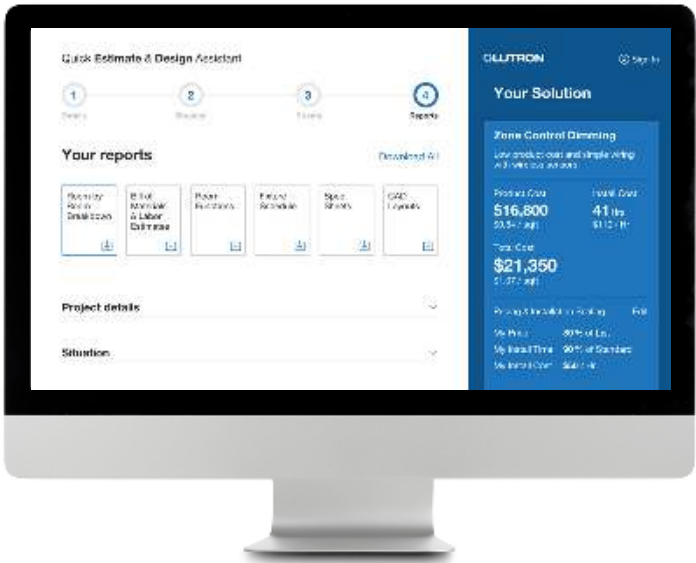

QuEst-D simplifies project estimates

- Start by answering simple questions about your project such as square footage, location, and project type. This is all you need for a basic project estimate.
- As you enter information, the QuEst-D software formulates real-time solutions and provides an instant estimate.

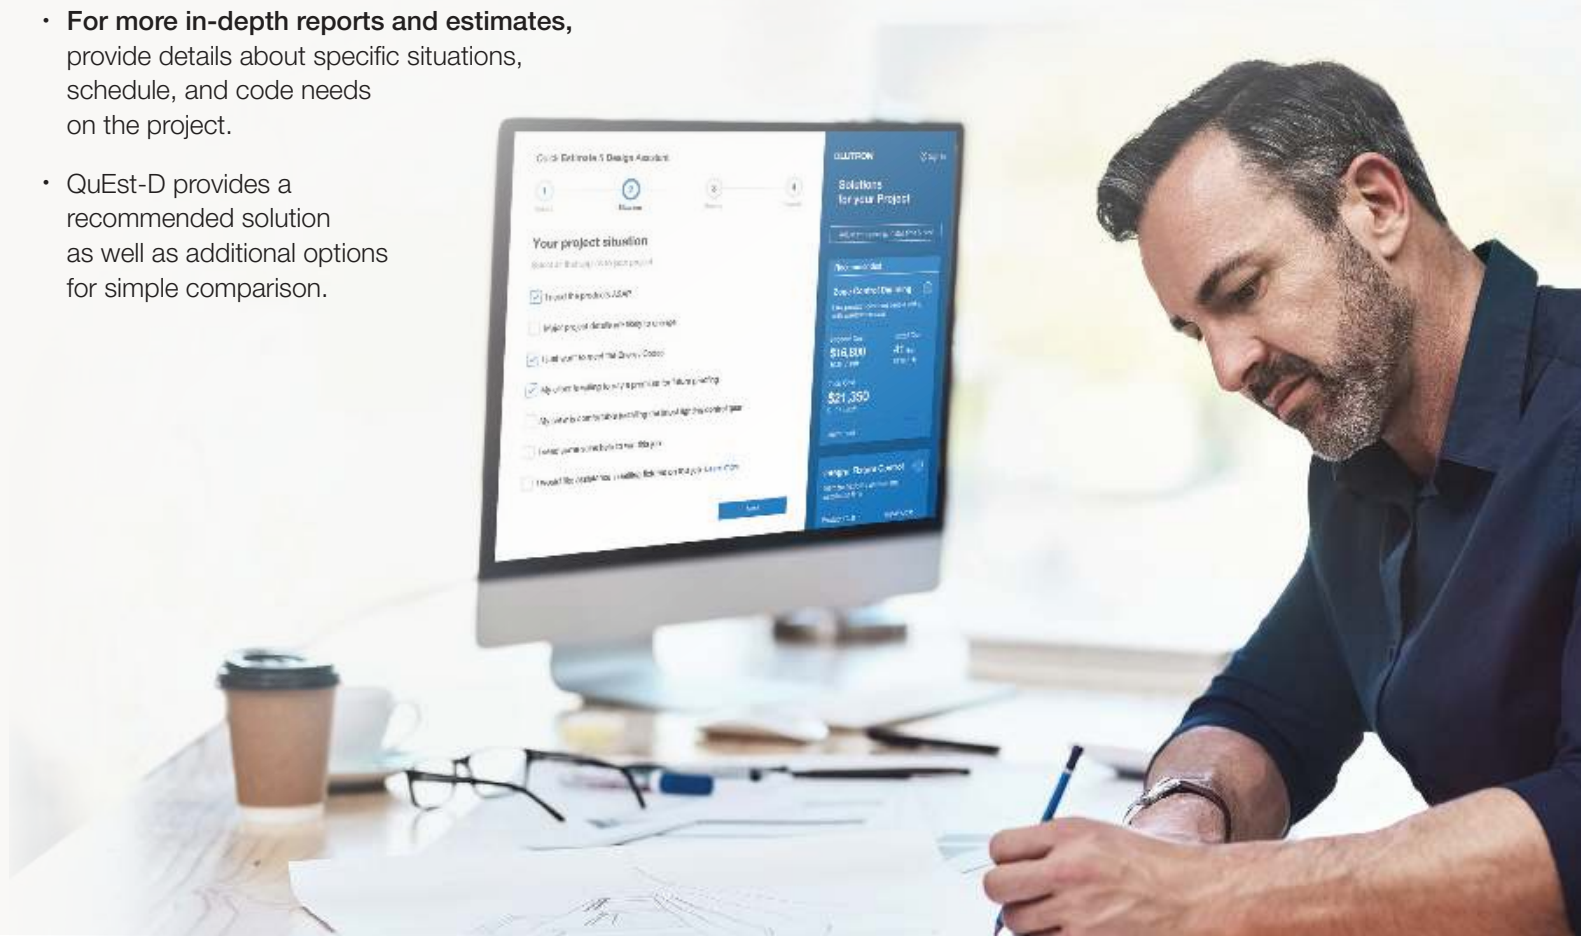

Delivers an accurate bill of materials and initial project reports

- Select the best option for your project and customer
- Each solution includes information you can share with your customers —
 - A bill of materials
 - Labor estimate
 - Project report

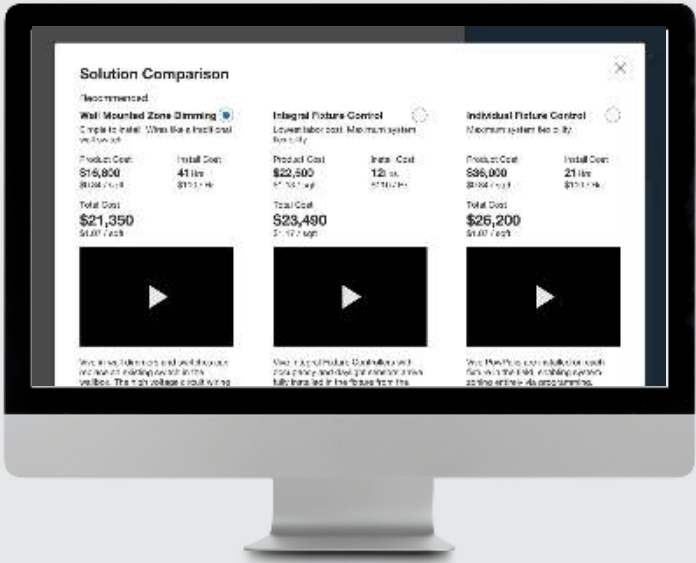

Includes the option to refine details

- For more in-depth reports and estimates, provide details about specific situations, schedule, and code needs on the project.
- QuEst-D provides a recommended solution as well as additional options for simple comparison.

Design with confidence

- QuEst-D provides fast, accurate, code-compliant estimates that you can confidently present to your customer. Each option identifies differences in product cost, installation cost and total cost.
- Control capabilities are explained to help your customer make an informed choice.
- Short videos offer further information about the features and benefits of each option.

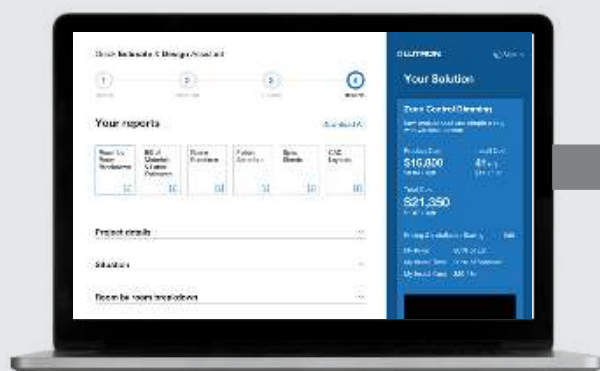

From quick estimates to detailed designs – bring it all together with Lutron Designer+

QuEst-D gives you everything you need to select the right solution and get an estimate to your customer.

Once you have selected the right project solution you can use Designer+ software to import floor plans, layer in design specifics, and create submittal reports. Lutron supports your total project needs.

QuEst-D

Quick estimate and project design

- Bill of materials
- Solutions/price comparisons
- Initial reports

Lutron Designer+

Detailed design

- Layout with floorplans
- Device connections
- Submittal reports

QuEst-D delivers faster, simpler, higher-confidence project estimates – get started today
